## **CPS Technology Solutions Partners with Global IT Security and Data Protection Leader Sophos to Secure Customer Data and Protect Against Latest Threats**

*Offers easy to manage, fully integrated endpoint, email, web and mobile security*

**[Hamel, MN] HAMEL** – August 12, 2011 – CPS Technology Solutions today announced that the company has achieved accreditation as a Sophos Channel Partner. As a Silver Partner, CPS and [Sophos](#) will collaborate in selling Sophos Security and Data Protection solutions.

CPS now offers customers an alternative for endpoint, email, web and security with Sophos's complete range of easy-to-manage, integrated threat and data protection solutions.

Designed exclusively for businesses – from small to mid-size companies to large enterprises - Sophos solutions defend against known and unknown malware, spyware, intrusions, unwanted applications, spam, and policy abuse, and provide data leakage prevention (DLP), encryption, and network access control (NAC).

Notably, Sophos offers comprehensive features and functionality, such as DLP and encryption via one agent and one management console - giving customers added value and security for their budget and helping them more easily comply with industry, state and government regulations.

“As Sophos products and services are sold exclusively through channel partners, it's extremely important that we select partners who are knowledgeable, reliable, and committed,” said Director of North American Channel Sales Matt Fogelgren at Sophos. “CPS has a solid track record in successfully selling business security solutions and proving their customers with high-quality support pre and post sale. We're pleased that CPS has joined the Sophos Channel Partner Program.”

“Sophos has established a reputation as one of the top security vendors and advisors in the industry – one that truly values product quality and support and fully engages and supports its partners,” said Robert Kennedy, President, at CPS. “With leading edge products, online pricing, quoting and ordering system, financing program options, and marketing support and

comprehensive training programs, Sophos empowers partners to succeed. We look forward to a long and profitable working relationship with Sophos.”

## **The Sophos Security and Data Protection Portfolio**

**Sophos Endpoint Security and Data Protection** offers anti-virus, anti-spyware, client firewall, host intrusion prevention, network access control, application control, device control, disk encryption and data leakage prevention.

**Sophos Email Appliances** – part of Email Security and Data Protection – provide simple, powerful protection against spam, malware and data loss. With a choice of three models and easy clustering, these managed appliances scale to meet the needs of any organization.

**Sophos Web Appliances** – part of Sophos Web Security and Control – block malware, spyware, phishing, anonymizing proxies and other unwanted applications at the gateway to ensure safe, productive web browsing. Offering simple enforcement of internet use policies and a seamless user experience, Sophos Web Appliances offer administrators comprehensive control.

**Sophos SafeGuard Enterprise** – is a multi-layered endpoint data security encryption and DLP solution designed to secure desktops, laptops, removable media and other portable devices. For businesses looking for a simplified full disk encryption solution for laptops and PCs, the company also offers Sophos SafeGuard® Easy.

Sophos solutions and support consistently earn top accolades from [industry analysts](#), [test labs](#), [trade](#) and [business press](#), [channel partners](#), and [customers](#) around the globe.
